Subject: microsoft settlement.

As a consumer I feel that Microsoft's products have made my life easier. I have felt from the beginning that this suit is an attempt by Microsoft's competitors to use the DOJ to "get back" at Microsoft. The DOJ under Janet Reno, allowed itself to be manipulated into prosecuting this case. Thankfully, the DOJ under Mr. Ashcroft is not buying into this farce. The States Attorneys Generals who continue to block a settlement seem to be doing so to grab headlines. If I lived in one of these states I'd make it a point to vote them out.
